How It Happened 3

Batesburg 3

Please keep Mary Wilbur, our beloved house mom, in your thoughts and prayers. She is currently out on medical leave and we are looking forward to her return.

Springing into new digs

Northeast Columbia is springing into the season with a new step this year. They will not be doing that dreadful spring cleaning like the rest of us. Instead the Jackson Creek EMS will be springing into a brand new building this year. Monteray Construction has teamed up with Richland County to build this facility. This newly constructed building is 9,400 square feet and sitting on 2.4 acres of land off of Two Notch Road. The building will

offer three fire truck bays, a dining facility, sleeping quarters, and showers for the firemen.

cility will bring a great service to the residents of the Northeast area. See the progress from

Monteray Construction was very pleased to be a part of this great project and knows this new fa-

start to finish on this wonderful new building on page 3.

The family of Monteray Construction would like to welcome home Jeff Noah. Jeff recently got

Welcome Home

back from a contract assignment in Iraq. He left in November of 2005 and returned to the states this past February. While there, Jeff lived in the Green Zone working

for KBR which worked directly under the United States Mission Iraq. Jeff's family, along with the Monteray family, are pleased to have him home safe.

SCANA on the move

Monteray Construction is happy to announce that they will be helping SCANA make the big move from downtown Columbia out to Cayce. The new location will be comprised of three buildings,

totaling about 63,000 square feet. SCANA is currently located at 1426 Main Street in the Palmetto Center Building; where they have been since 1983. The employees at the downtown office and various other locations, will all move to the

new facility once it is completed. Work is scheduled to start in the Summer of 2007. We look forward to helping make this transition and milestone go as smoothly as possible.

Did You Know?

Way back in 1927, an employee of the Southland Ice Company in Dallas, Texas, starting selling such grocery items as eggs, milk and bread, from the company's ice dock. In less time than it takes to say 7-11, the convenience store was born, and named for the hours it was open: 7a.m. to 11p.m. When its "convenience" was noted, the idea took off and competitors sprung up by the dozens. But 7-11 forged on, extending their actual hours to 24 a day, but keeping the original name.

They were the first outlet of their kind to operate around the clock, sell fresh coffee in disposable cups, provide self-serve soda bars, offer all major brands of soft drinks, and serve extra large drinks. To promote all this, they also became the first convenience store to advertise, producing an ad for television in 1949 that featured an animated rooster and owl, symbolic of when they were open.

Their 5800 stores in the U.S. and Canada, and a total of 25,000 worldwide, make them the largest retail convenience stores in the world.

Out of all American re-

tailers, 7-11 sells more cold beer, cold bottles of water, cold Gatorade, fresh-grilled hotdogs, single servings of chips, Sports Illustrated magazines, USA Today newspapers and...money orders.

The most Slurpees are downed in Winnipeg, Manitoba, Canada (a notoriously cold place in winter) and Detroit, Michigan (almost as cold); coffee is chugged down in record gallons in Long Island, N.Y; Big Gulps disappear by the gallon in Las Vegas and Utah; hot dogs are scarfed more in Washington, D.C. than anywhere else, and nachos are the nosh of choice in Colorado.

"7-Eleven was the first convenience store to have television advertising. The animated commercial ran in 1949 and had a singing rooster and owl."

Batesburg-Leesville, teaching tomorrow's future

Midlands Technical College is expanding again. Ground has been broken and construction is well underway for the new Batesburg-Leesville Education Center. Midlands Tech currently has five locations through-

out the Midlands. Those locations are Beltline, Airport, Harbison, Fort Jackson, and The Northeast campus. This new location will give those living in the Batesburg Leesville area a more centralized location to learn from. This will be the first building on the campus for Midlands Tech

and the city of Batesburg. The building will contain general purpose classrooms, high tech rooms, and administrative offices. Monteray Construction was pleased to partner up Midlands Tech and Quackenbush Architects and Planners to build this facility. Stayed tuned for more information on the progress of this facility.
